

How To Delete Your Old Outlook Profile

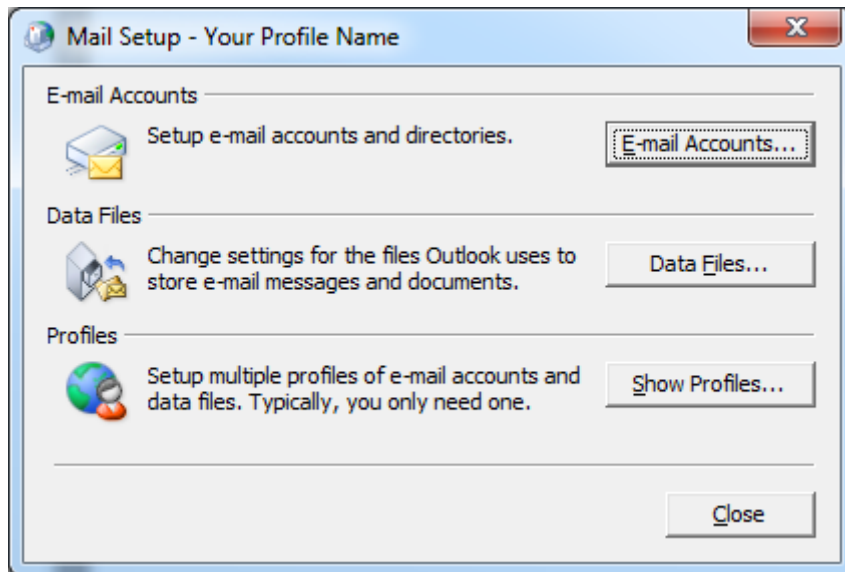

Before you can use your New outlook email where going have to delete the old one so to start off goes to Start and click control panel:

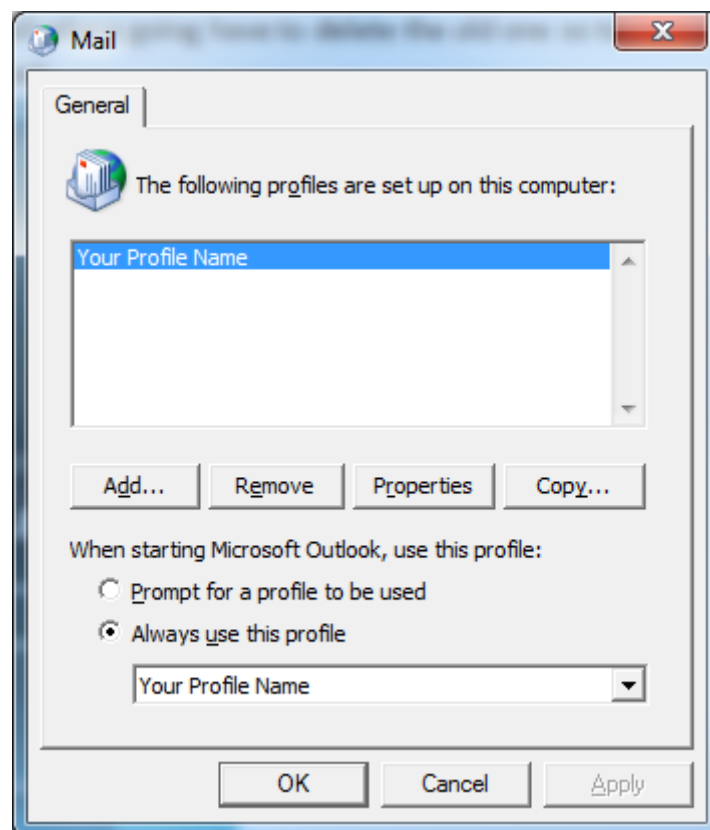

When control panel is open click Mail (32-bit) as highlight in the image below

When the mail setup opens click on Show Profiles.

When the box opens up delete any profiles that are there

By highlighting the profile and click remove after that a pop up box will appear click yes and then click apply and that's your old outlook profile removed.
